

BEAUTIFUL FUTURES CAMPAIGN

Green Jobs. Housing for All. A Livable Community.

We believe that local government can make a direct positive impact on people's lives. That's why we're calling on our leaders to embrace policies that put the needs of our community and environment first.
Our Beautiful Future starts now, and it starts with us.

GREEN JOBS + INFRASTRUCTURE

Local governments can address the climate crisis, prioritize disadvantaged communities, and create good, living-wage jobs through:

- Improving municipal water systems.
- Addressing waste incinerators and their pollutants.
- Replacing privately-owned utilities like Central Hudson with publicly-owned utilities powered by renewable energy that are accountable to New Yorkers.

HOUSING FOR ALL

We want a community that fosters racial and class diversity, where everyone has stable access to safe, clean, energy-efficient housing. We must:

- Build housing that everyone can afford.
- Help residents retrofit existing buildings to save money on energy bills, reduce fossil fuel emissions, and protect children's health.
- Create a plan to dramatically increase the amount of affordable housing.

LIVABLE + EQUITABLE COMMUNITIES

We envision an accessible, equitable, thriving community with resources that enhance everyone's quality of life, like:

- Modernized public transit options that are more reliable and frequent.
- Street improvements to make biking, walking, and rolling easy and safe.
- Community infrastructure that prioritizes the needs of residents, such as public parks, central gathering spaces like community centers, and essential amenities like grocery stores and medical care.

Excited about this vision for our beautiful future?
